Summary

Computer Engineering final-year student with strong foundational knowledge in Computer Networks, Operating Systems, and Network Security. Familiar with TCP/IP, routing and switching fundamentals, Linux systems, and basic network troubleshooting tools. Interested in network monitoring, incident handling, and maintaining high system availability. Seeking to gain practical experience in System and Network Monitoring environments.

Technical Skills

Networking & Monitoring: TCP/IP, OSI Model, IP Addressing, Subnetting, Routing Fundamentals, SNMP Basics

Tools: Cisco Packet Tracer, Wireshark, Linux (Basic Commands), Git, GitHub

Programming: Python

Projects

Home Lab Network Design | *Cisco Packet Tracer*

- Designed and implemented a simulated enterprise network topology.
- Configured IP addressing and routing between multiple devices.
- Performed connectivity validation and troubleshooting using ICMP tools.
- Simulated network failures for fault isolation practice.
- **GitHub:** github.com/birendrachy7/Home-Lab-Network-Design

SNMP Network Monitoring Lab | *Network Monitoring*

- Configured SNMP-based monitoring environment for device performance tracking.
- Monitored uptime and interface status using SNMP protocols.
- Practiced monitoring techniques used in NOC environments.
- **GitHub:** github.com/birendrachy7/SNMP-Network-Monitoring-Lab

Python Network Monitoring Tool | *Python*

- Developed CLI tool to monitor device availability using ICMP ping.
- Implemented periodic monitoring and logging functionality.
- Automated network health checks to detect downtime.
- **GitHub:** github.com/birendrachy7/network-monitoring-tool

Certifications & Training

- Computer Network and Security (20-Hour Non-Credit Course) – NAST College, 2026
- Programming with Python 3.X

Education

Bachelor of Engineering in Computer Engineering

National Academy of Science and Technology (NAST)

Expected Aug 2026

Affiliated to Pokhara University
